CURRICULUM VITAE

BRIAN MISOCHO MORANG'A

Senior Backend Engineer — AI Systems & Distributed Systems

Nairobi, Kenya · morangabrian04@gmail.com · +254 798 734 967 · github.com/misocho · linkedin.com/in/brian-moranga · misocho.github.io/portfolio

PROFESSIONAL SUMMARY

Senior backend engineer with 7 years of experience building software across AI-enabled products, healthcare technology, sports performance analytics, and business operations. Experienced in Python backend development, API design, asynchronous processing, data pipelines, and cloud-native systems. Combines practical software engineering with AI integration, emphasizing validated data, explicit business logic, system reliability, and maintainable architectures.

PROFESSIONAL EXPERIENCE

ENKAAI

Aug 2026 – Present

Part-Time Backend Engineering Consultant — Nairobi, Kenya

An AI-powered procurement and operations platform connecting existing business systems, operational data, supplier communications, and documents.

- Part of the team that took the platform from idea to a beta with testing customers in about three months.
- Design and build backend services and APIs with Python, FastAPI, PostgreSQL, and Docker, plus data models for procurement, suppliers, purchase orders, invoices, and operational exceptions.
- Implemented strict validation and normalization for imported operational data, with LLM-assisted extraction behind deterministic business rules.
- Added human approval workflows and auditing for consequential actions, and automated coverage for import correctness and idempotent processing.

DEVCENTREHOUSE

Feb 2026 – Aug 2026

Software Engineer — Remote · Ireland

Software engineering across backend services, APIs, and asynchronous processing for AI-enabled applications.

- Developed and maintained backend services and REST APIs for AI-enabled applications.
- Built asynchronous processing pipelines and service integrations that move work off the request-response path.
- Kept business rules explicit alongside AI capabilities, and supported maintainability and code quality.

BEOFLOW B.V.

Nov 2023 – Dec 2025

Backend Engineer — Remote · Netherlands

Backend engineering for a coach- and athlete-facing performance platform processing training and monitoring data, as part of a wider engineering team.

- Developed and maintained backend services and application APIs for a coach- and athlete-facing performance platform.
- Built asynchronous pipelines processing time-series performance data used by analytics.
- Led a Rust rewrite of the per-athlete readiness recomputation, cutting processing time from seconds to milliseconds.
- Integrated AI-enabled analytics into existing workflows.

DORSA AI

Jan 2021 – Oct 2023

Backend Lead — Remote · United States

Backend systems for an AI-enabled perioperative-care platform supporting time-sensitive operating-room workflows.

- Led backend engineering for an AI-enabled perioperative-care platform within a six-person team of backend, hardware, sound and junior engineers.
- Owned the backend services and APIs (including multi-tenancy), NLP and AI-enabled workflow orchestration, data processing and surgery-document ingestion, and deployments.
- Worked with Docker and AWS infrastructure to support deployment and operation, and contributed to the front-end web app and a Raspberry Pi device when needed.
- Contributed to product and workflow improvements associated with approximately 15 minutes less surgical turnover per procedure — an internal estimate across partner hospitals over about a year (a team- and product-level outcome, not attributed to one person).

INFOCAP ENTERPRISES

Nov 2019 – Jan 2021

Software Developer — Nairobi, Kenya

Software development for a livestock-management platform serving farmers and related business operations.

- Developed backend functionality with Django and related web technologies.
- Built and maintained REST APIs, data models, and business logic for livestock-management workflows.
- Contributed marketplace and financial and operational features across backend and frontend components.

ANDELA KENYA

May 2019 – Oct 2019

Software Engineering Intern — Nairobi, Kenya

Foundational experience in web application engineering, backend development, and collaborative delivery.

- Built web application features using Python, Django, and React.
- Contributed to API development and dashboard and reporting interfaces in an aid-distribution context.
- Worked within a collaborative, source-controlled, and tested engineering workflow.

TECHNICAL SKILLS

LANGUAGES & FRAMEWORKS: Python · FastAPI · Django · Django REST Framework · Flask · TypeScript · JavaScript · React · Next.js · Node.js · NestJS · SQL

DATA & STORAGE: PostgreSQL · MySQL · Redis · pgvector · Relational data modeling · Schema evolution · Data validation and normalization · Time-series processing · Ingestion pipelines · Migrations · Idempotent processing

CLOUD & DEVOPS: AWS (ECS, Lambda, RDS, S3) · Docker · CI/CD · GitHub Actions · Environment configuration · Deployment and troubleshooting

SYSTEMS & ARCHITECTURE: REST API design · Distributed systems · Microservices · Asynchronous processing · Event-driven architecture · Workflow orchestration · External integrations · Error handling · Auditing and traceability · Performance optimization · Testing

AI ENGINEERING: LLM integrations · Structured extraction · Document processing · Classification · Deterministic business rules · Output validation · Human-reviewed workflows

EDUCATION

KISII UNIVERSITY

Sep 2016 – Dec 2023

BSc Mathematics with Computing
